

**Assignment #1 – Domain Mapping – Climate Equity Action in your Jurisdiction**

**Domain #1 - Local Public Health Department/ Healthcare Agency**

Greetings! We are thrilled to welcome you to the Alliance's Regional Climate Equity Accelerator. As we prepare to explore and implement equitable climate actions, we ask that you all take time to reflect and learn about the status of climate actions and initiatives in your jurisdiction.

This exercise includes 3 domains, which are structured to represent some of the key sectors within each jurisdiction that have influence or involvement in jurisdiction-level climate action, whether through programs, policies, or other initiatives. This assignment is the starting point to develop a more complete ecosystem map of climate-related efforts and opportunities underway in your jurisdiction. Your Accelerator team will continue to build out this map throughout the course of the Accelerator to identify facilitators and barriers to cross-sector collaboration and implement climate actions to advance climate equity.

Instructions: The individual(s) assigned to this domain should review the appropriate materials and answer the questions as completely as possible. Please complete and return Assignment #1 to the Alliance (snorth@phi.org) by **EOD Tuesday, April 16<sup>th</sup>**.

*Note - The suggested plans, agencies, and organizations are not comprehensive, but provide a place to begin reviewing the relevant plans, initiatives, and policies.*

**Domain #1 - Local Public Health Department/ Healthcare Agency**

Instructions: Select two of the following documents and answer the questions for each.

**Staff Member Responsible for Domain:**

**Key Document #1:**

- Strategic Plan
- Community Health Improvement Plan
- Community Health Needs Assessment
- Other:

**Key Questions Document #1**

1. Is climate change explicitly included?
  - Yes
  - No
  - Unsure

**If yes, Where?**
2. Which climate hazards and climate-related health impacts are included?
3. Are there specific strategies, milestones, or metrics?

4. Do the strategies or actions include mitigation, adaptation, or resilience?
5. What data sources/tools were used?
6. Is there an entity tasked with implementing and monitoring the actions/strategies?
7. Are you aware of any funding associated with the climate-related component of the plan?  
Yes  
No  
Unsure

**Key Document #2:**

- Strategic Plan
- Community Health Improvement Plan
- Community Health Needs Assessment
- Other:

**Key Questions Document #2**
