

Assignment #1 – Domain Mapping – Climate Equity Action in your Jurisdiction

Domain #2 - Local Offices & Agencies

Greetings! We are thrilled to welcome you to the Alliance's Regional Climate Equity Accelerator. As we prepare to explore and implement equitable climate actions, we ask that you all take time to reflect and learn about the status of climate actions and initiatives in your jurisdiction.

This exercise includes 3 domains, which are structured to represent some of the key sectors within each jurisdiction that have influence or involvement in jurisdiction-level climate action, whether through programs, policies, or other initiatives. This assignment is the starting point to develop a more complete ecosystem map of climate-related efforts and opportunities underway in your jurisdiction. Your Accelerator team will continue to build out this map throughout the course of the Accelerator to identify facilitators and barriers to cross-sector collaboration to advance climate equity.

Instructions: The individual(s) assigned to this domain should review the appropriate materials and answer the questions as completely as possible. Please complete and return Assignment #1 to the Alliance (snorth@phi.org) by **EOD Tuesday, April 16th**.

Note - *The suggested plans, agencies, and organizations are not comprehensive, but provide a place to begin reviewing the relevant plans, initiatives, and policies.*

Domain #2 - Local Offices & Agencies

Instructions: Select one of the following jurisdiction offices or agencies and answer the following questions.

Staff Member Responsible for Domain:
