

**Assignment #1 – Domain Mapping – Climate Equity Action in your Jurisdiction**

**Domain #3 - Local community-based and environmental justice organizations**

Greetings! We are thrilled to welcome you to the Alliance's Regional Climate Equity Accelerator. As we prepare to explore and implement equitable climate actions, we ask that you all take time to reflect and learn about the status of climate actions and initiatives in your jurisdiction.

This exercise includes 3 domains, which are structured to represent some of the key sectors within each jurisdiction that have influence or involvement in jurisdiction-level climate action, whether through programs, policies, or other initiatives. This assignment is the starting point to develop a more complete ecosystem map of climate-related efforts and opportunities underway in your jurisdiction. Your Accelerator team will continue to build out this map throughout the course of the Accelerator to identify facilitators and barriers to cross-sector collaboration to advance climate equity.

Instructions: The individual(s) assigned to this domain should review the appropriate materials and answer the questions as completely as possible. Please complete and return Assignment #1 to the Alliance (snorth@phi.org) by **EOD Tuesday, April 16<sup>th</sup>**.

*Note - The suggested plans, agencies, and organizations are not comprehensive, but provide a place to begin reviewing the relevant plans, initiatives, and policies.*

**Domain #3 - Local community-based and environmental justice organizations**

Instructions: Identify two CBO or EJ organizations in your jurisdiction and answer the following questions

**Staff Member Responsible for Domain:**

**Community-Based Organization #1**

**Key Questions**

1. What is the climate-related focus of this entity?

Hazard specific focus or goals? Please explain.
